

## MagFly® AP: Repair of Separation Pins

**Note:** The following steps should not be done on a steel surface. There is a high risk of injury due to the high magnetic force!

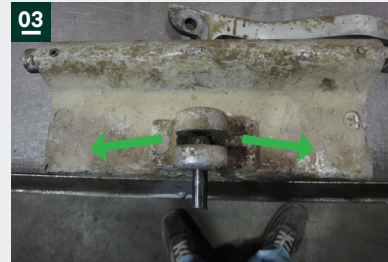

### Pictures for Professional Repair

**01:** Remove dowel pin

**02:** Remove lever

**03:** Remove bolt cover

**04:** Loosen and remove the bolts

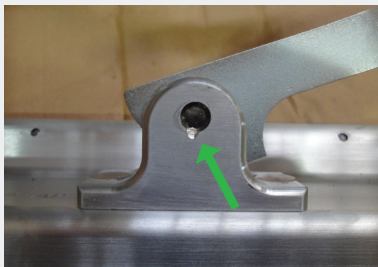

**05:** Remove the bearing block

**06:** Dismantle and replace the separation pin

Afterwards the assembly is carried out in reverse order.

**Please note:**

Set a notch to hold the cylindrical pin in position.

Done!
